

METHODS AND SYSTEMS FOR EMBEDDING CAMERA INFORMATION IN IMAGES

Abstract of the Disclosure

5 The present invention is related to providing, in association with an image,
information related to the image capture device used to capture the image. In one
embodiment, information related to a first static camera characteristic and camera
setting information related to a first captured digitized image is embedded in the first
captured digitized image using a watermark. The watermarked information may be used
10 to identify the source or owner of the picture, and/or to aid in the more accurate
reproduction of the image.
